

University of California IPFP, IPM, and WPMA Pest Update #9
Tehama County 5/22/06

IPFP = Integrated Prune Farming Practices
 IPM = Integrated Pest Management
 WPMA = Walnut Pest Management Alliance

INSECT	FIRST BIOFIX	SECOND BIOFIX	THIRD BIOFIX	FOURTH BIOFIX	ACTIVITY MOTHS/DAY	AVG. DEG. DAYS/DAY	DAY DEGREES FROM BIOFIX
CODLING MOTH	4/27	-	-	-	1.5	15.5	484
ORIENTAL FRUIT MOTH	3/20	-	-	-	5.8	20.5	962
PEACH TWIG BORER	5/11	-	-	-	.38	15.5	225
NAVEL ORANGE WORM	-	-	-	-	0	0	0
SAN JOSE SCALE	4/24	-	-	-	-	14.8	498

The next event in Codling Moth phenology will be the so called "1B". We predict that activity somewhere around 600 Degree Days. 600-484 leaves 116 DD remaining. At 15 per day we could see "1B" trap increase in about 7 days Additional Codling Moth info is available at the UC IPM website <http://www.ipm.ucdavis.edu>.

OFM is at 962 DD we should see a second biofix soon for that insect
