

University of California IPFP, IPM, and WPMA Pest Update #15
Tehama County 7/03/06

IPFP = Integrated Prune Farming Practices
 IPM = Integrated Pest Management
 WPMA = Walnut Pest Management Alliance

INSECT	FIRST BIOFIX	SECOND BIOFIX	THIRD BIOFIX	FOURTH BIOFIX	ACTIVITY MOTHS/DAY	AVG. DEG. DAYS/DAY	DAY DEGREES FROM BIOFIX
CODLING MOTH	4/27	6/22	-	-	3.5	25.0	291
ORIENTAL FRUIT MOTH	3/20	5/22	-	-	16.4	30.0	1080
PEACH TWIG BORER	5/11	-	-	-	1.8	25.0	1092
NAVEL ORANGE WORM	5/26	-	-	-	0.63	20.0	665
SAN JOSE SCALE	4/24	-	-	-	-	24.3	1330

Codling Moth Degree Days are currently at 291 DD in the orchard we monitor. Additional Codling Moth info is available at the UC IPM website <http://www.ipm.ucdavis.edu>.

Back on 6/22 we caught one male walnut husk fly in one Dairyville orchard we monitor and one male and one female in the second Dairyville orchard. No WHF since 6/22. We are watching those traps carefully for females with eggs. Remember the female flies have the "blond" front legs. To make it easy to remember, the girls are blonds.

NOW and OFM appear to be increasing so we may be close to additional biofixes for those two insects
