

University of California IPFP, IPM, and WPMA Pest Update #15
Tehama County 6/25/07

IPFP = Integrated Prune Farming Practices
 IPM = Integrated Pest Management
 WPMA = Walnut Pest Management Alliance

| INSECT | FIRST BIOFIX | SECOND BIOFIX | THIRD BIOFIX | FOURTH BIOFIX | ACTIVITY MOTHS/DAY | AVG. DEG. DAYS/DAY | DAY DEGREES FROM BIOFIX |
|---------------------|--------------|---------------|--------------|---------------|--------------------|--------------------|-------------------------|
| CODLING MOTH | 3/26 | 6/11 | - | - | 11.0 | 22.5 | 339 |
| ORIENTAL FRUIT MOTH | 3/5 | 5/10 | 6/11 | - | 8.6 | 27.5 | 411 |
| PEACH TWIG BORER | 4/2 | 6/11 | - | - | .69 | 22.5 | 339 |
| NAVEL ORANGE WORM | 4/30 | 6/21 | - | - | 6.1 | 17.8 | 71 |
| SAN JOSE SCALE | 3/19 | - | - | - | - | 21.8 | 1347 |

Codling moth degree days are 339 after the second biofix on 6/11. Notice the relatively high moths per day count. We caught 33 female and 11 males on 6/25.

We have 3 Walnut Husk Fly traps up in Hartley in the Dairyville area. We trapped a single male walnut Husk fly on 6/25/07. Everyone should have traps up by now and watch them for activity.

Notice the second Biofix for NOW on 6/21 728 DD after the first. We are seeing substantial egg laying on our traps.

Notice the third Biofix for OFM 6/11

Additional Pest management information is available at the UC IPM website.
