SAN JOSE SCALE	3/19	-	-	-	-	26.0	2828

Codling moth degree days are at 944 after the third biofix on 7/19. We caught 2.3 moths per day over the weekend.

Notice the fourth biofix for NOW on 8/27/07. Over the weekend we caught 9.7 eggs per day. So we are measuring significant egg laying which should continue into September. Damaged nuts and early hull split may be vulnerable to NOW.
