

University of California IPFP, IPM, and WPMA Pest Update #25  
Tehama County 9/4/07

IPFP = Integrated Prune Farming Practices  
 IPM = Integrated Pest Management  
 WPMA = Walnut Pest Management Alliance

INSECT	FIRST BIOFIX	SECOND BIOFIX	THIRD BIOFIX	FOURTH BIOFIX	ACTIVITY MOTHS/DAY	AVG. DEG. DAYS/DAY	DAY DEGREES FROM BIOFIX
CODLING MOTH	3/26	6/11	7/19	-	3.0	28.3	1139
ORIENTAL FRUIT MOTH	3/5	5/10	6/11	7/19	.94	33.8	1387
PEACH TWIG BORER	4/2	6/11	7/23	-	6.7	28.3	1044
NAVEL ORANGE WORM	4/30	6/21	7/23	8/27	.56	24.8	170
SAN JOSE SCALE	3/19	-	-	-	-	27.8	3020

Don't forget to keep an eye on Walnut Husk Fly. If you are more than 3 weeks from harvest WHF can become a problem.

Notice the fourth biofix for NOW on 8/27/07. Over the weekend we caught .56 eggs per day. So we are measuring significant egg laying which should continue into September. Damaged nuts and early hull split may be vulnerable to NOW.

Additional Pest management information is available at the UC IPM website.
