

University of California IPFP, IPM, Pest Update #16  
Tehama County 7/13/09

IPFP = Integrated Prune Farming Practices  
IPM = Integrated Pest Management

INSECT	FIRST BIOFIX	SECOND BIOFIX	THIRD BIOFIX	FOURTH BIOFIX	ACTIVITY MOTHS/DAY	AVG. DEG. DAYS/DAY	DAY DEGREES FROM BIOFIX
CODLING MOTH	3/30	6/11	-	-	1.3	21.8	805
ORIENTAL FRUIT MOTH	3/16	5/18	6/25	-	.13	26.8	561
PEACH TWIG BORER	4/20	6/18	-	-	10.8	21.8	662
NAVEL ORANGE WORM	-	-	-	-	0	-	-
SAN JOSE SCALE	-	-	-	-	0	-	-

Codling moth Degree Days are at 805 and our trap catches continue to decline. Any increases about 1000 DD should be the start of the third flight Service traps and watch for increased activity. Additional Pest management information for Codling moth is available at the UC IPM website <http://www.ipm.ucdavis.edu>.

We caught 12 Walnut Husk flies today 7/13, six males, three females and 3 females full of eggs. Watch traps carefully and treat when you find first females with eggs. If you need help looking for eggs give us a call. Remember the females have blond front legs, squish the abdomen and look for “grains of rice” which are the eggs.
